Plus there's a strut tower-to-tower steel brace that adds to the structural integrity and enhances Monte Carlo's precise driving response. The bottom line? Every time you slide behind the wheel, you're in the winner's circle.

MONTE CARLO

THE SOLID FOUNDATION OF A CHAMPION.

MONITORING SYSTEMS FOR OIL REPLACEMENT AND TIRE INFLATION

The oil life monitoring system lets you know when the engine oil needs replacing, based on your driving conditions. The available Tire Inflation Monitor signals if there is a significant air pressure difference between any of the tires.

STRUT TOWER-TO-TOWER STEEL BRACE

A strut tower-to-tower steel brace adds to the structural integrity and enhances Monte Carlo's precise driving response.

STATE-OF-THE-ART ELECTRICAL SYSTEM

Monte Carlo features a bussed electrical center at each end of the instrument panel which houses all fuses, relays and splices for a given zone, making the electrical system easier to service.

ALUMINUM ENGINE CRADLE

Monte Carlo has agile responsiveness thanks to an engine cradle made of lightweight, but stiff, extruded aluminum. This design also reduces vibration and noise from the powertrain.

SAFETY-CAGE CONSTRUCTION

A reinforced steel cage surrounds the entire passenger compartment and includes a unique energy-absorbing headliner backed with corrugated material to help protect you in the event of a collision.

FIGHTING RUST

Two-sided galvanized steel on all exterior body panels, except the roof, resists corrosion. And the exhaust system is made of long-lasting stainless steel with an aluminized stainless-steel muffler and tailpipe.

ONE-PIECE SIDE STRUCTURE

A one-piece door "ring" provides structural rigidity and uniform build quality — a key reason why Monte Carlo has such a quiet ride and solid feel on the road.

TUNED FOUR-WHEEL INDEPENDENT SUSPENSION

A precisely tuned four-wheel independent suspension with coil springs, stabilizer bars, and wide wheels provides a superb blend of confident control and driving comfort.

ENHANCED FLOOR PAN STRUCTURE

Three cross members tie into the rocker panels to provide excellent support and structural rigidity. And that helps Monte Carlo occupants enjoy a solid, comfortable ride.

MAGBEAM STRUCTURE

A magnesium instrument panel beam spans the width of Monte Carlo. The cast beam is precisely shaped to package smaller components, helping reduce squeaks and rattles, especially in the heating, air conditioning and audio systems. It also provides a sturdy foundation for the steering wheel column, reducing vibration.

FOUR-WHEEL DISC BRAKES

Monte Carlo features standard four-wheel disc brakes. The racing-inspired front cooling ducts assist in dissipating heat from the rotors and calipers to help minimize fading.
